

1

First, you should download the latest version of the Joomla plugin. Simply click the download button in the web application or you can download the latest version from the link bellow. It's advisable to always have the latest plugin version so come around from time to time to see if you're still working with the latest version.

<https://github.com/timify/joomla-plugin/archive/master.zip>

2

Next, login to your Joomla website as an administrator in order to install the plugin. In the navigation, click the menu item "Extensions" and choose "Manage > Install" from the dropdown menu. Then click on "Upload Package File" and upload your file then click the "Upload & Install" button.

3

Once you have installed the plugin go to "Extensions" then select "Plugins" from the dropdown menu.

4

From the list click on "TIMIFY Widget".

5

Copy your booking ID from the TIMIFY Web App and paste it in "Your TIMIFY ID" field in Joomla. You will find your booking ID in the TIMIFY Web App at the bottom of the page "Booking buttons" in the section "Online booking".

6

Define the position of the button. We offer you three options:

- button on the right & button on the left, which will show always on all your pages
- button at the end of every post. Here you will be able also to define the label for this button.

7

Finally, find the "Status" field and set it to "Enable" then click the "Save" button

8

Additionally you have the option to define the main language the widget should be displayed. If your country is not displayed in the list please write an email to support@timify.com
